'Draw lines to match up the pairs of calculations.'

I can use this  
calculation...

$$\boxed{6 \times 3 =}$$

$$\boxed{5 \times 4 =}$$

$$\boxed{8 \times 2 =}$$

$$\boxed{9 \times 3 =}$$

...to help me  
solve this  
calculation.

$$\boxed{8 \times 20 =}$$

$$\boxed{60 \times 3 =}$$

$$\boxed{9 \times 30 =}$$

$$\boxed{50 \times 4 =}$$

Problem solving

1. Six classes each raise £400 for charity.  
How much have they raised altogether?
2. A factory makes 540 balls every hour. They are put in packs of 6.  
How many packs are made every hour?

## Grammar and punctuation

Task 1

A main clause is a group of words that contains a verb and a subject which makes complete sense on its own.

e.g. Lucy sauntered into Narnia, when the clock struck three.

1. Write 3 sentences based in Narnia and underline the main clause.

Task 2

A subordinate clause is a group of words that is dependent on the main clause because it doesn't make sense on its own. It starts with a subordinating conjunction (I SAW A WABUB)  
e.g. Lucy sauntered into Narnia, when the clock struck three.

2. Write 3 sentences based in Narnia and underline the subordinate clause.

Task 3 – Tick to show the correct clause:

	Main clause	Subordinate clause
You must wear your coat when you go outside.		
I'm going into town because I need to get a new pair of shoes.		
I will, when the bus arrives, sit at the front.
