Welcome to the world of Phillip Wright where everything is going wrong. Join us on this emotional rollercoaster, with a thrill that jumps out at you with the turn of every page. For an example, Phillip feels happy meeting his 'girlfriend' but he is distraught when his mother has breast cancer; in my opinion, Phillip is bold since he was facing things that were too old for his age. Throughout this book, I was amazed with how the author had explained Philip's problems because they all sounded realistic, and really was in tune with how a normal child would think and feel.

I would rate this story 10/10 because it was interesting and unexpected (full of surprises).
