Dear Parents and Guardians,

I am delighted to introduce myself as the new Chair of Governors. It is a privilege to take on this role and to support the school in its continued growth and success.

A bit about me: I currently work in London as a Project Manager at a financial technology startup, where we are focused on developing the next generation of digital currency. My career has been rooted in technology and innovation, but education has always been a personal passion of mine. I previously worked at an education technology startup, where we designed robots to help children learn electronics and computer science, blending creativity with learning in new and exciting ways.

My parents are from Bangladesh, but I grew up in Windsor and attended university at UCL to study for my Masters in Electronic Engineering, and I'm excited to bring both my professional and personal experiences to my role as Chair of Governors. I look forward to working closely with the school leadership, staff, and all of you to ensure that the children continue to receive the best possible education in a supportive and inspiring environment.

*Kind regards,
Rezaul Nuru*

Chair of Governors
